

# Questions When Using AI

What questions should I be asking myself when I am thinking about using an AI tool to support my learning?

## Before I start using AI...

- Did I ask my teacher if I can use AI?
- What can AI help me do for this assignment (AI Icons)?
- What do I want AI to help me learn?
- What questions do I want to ask AI?
- Is AI the best helper or should I try to use something else first?
- How can I make sure I don't copy someone else's words or ideas?

## While I am using AI...

- Do I know how AI figured out this answer?
- Did I check if the answer from AI is correct?
- Is there another way to look at this that AI didn't show me?
- Where else can I find more information or other answers?
- Am I asking AI different questions to see other answers it gives?

## After I use AI...

- Did I explain how AI helped me?
- Did I cite all my sources to give them credit?
- Is AI helping me learn to do things by myself?
- Can I do this work on my own next time?
- Is AI the most helpful tool for this type of work in the future?
