This School Site Facility Master Implementation Plan presents an overlay of the facility ed. specs. - approved by the USD Board, Nov. 2011 - onto the existing facility plan. The proposed facilities modifications and enhancements were reviewed by a school site committee; this plan reflects their input. It represents a 20-year vision for the school site, with phased implementation as funding is available. Once funding is determined for specific projects, further discussions with school site and district stakeholders will refine the design and details of the projects. The current approved ed. specs. will provide the framework for the design. The modifications shown here reflect a rough potential layout, to establish budgets; they are not intended to represent a final design. During the later detailed design phase, building, site, and funding constraints may require changes to this original plan.
