

COVID-19 Child - General Masked - Possible Classroom Exposure

[DATE]

Dear **[insert school]** Parent/Guardian,

I am writing to inform you that your child was in the same classroom as a person that tested positive for COVID-19 at **[FACILITY]** on **[DATES]**. Because there was consistent mask wearing, in addition to other health and safety mitigation strategies in effect at the time of exposure, the risk for transmission is very low. Your child may continue to attend school for in-person instruction as long as your student does not develop symptoms.

Continue to monitor your child for symptoms through **[14 DAYS FROM EXPOSURE]** by:

1. Checking their temperature twice a day.
2. Watching for fever, fatigue, cough, shortness of breath, and other signs/symptoms of COVID-19, such as chills, sore throat, muscle aches, diarrhea, or loss of sense of taste or smell. Additional symptoms may occur.
3. It is also recommended that your child test 5 days from the date of possible exposure.

If any symptoms develop, keep your child home, call their health care provider for advice, notify the school **[ADMINISTRATOR/CONTACT], and arrange for them to get tested.**

Testing options include:

- IUSD provided home PCR tests (available at your school site)
 - [Sample Collection Directions](#)
 - [Registration Directions](#)
- Family health care provider
- Community Testing Centers
 - [City of Irvine Testing Centers](#)
 - [Orange County COVID Clinic](#)

For additional information about COVID-19, visit the Orange County Health Care Agency website, which also includes a COVID-19 health line: [OCHCA COVID Information](#). If you have further questions or concerns, please contact **[name and contact information here]**.

Sincerely,

[Name and Title Here]
