

SUPERVISOR II-TECHNOLOGY SUPPORT

DEFINITION:

Under the general direction of the Chief Technology Officer, plans and executes goals and objectives of the District's Technical Support Program; supervises and provides direction to assigned technical support personnel; evaluates program effectiveness.

DISTINGUISHING CHARACTERISTICS:

The Supervisor I classification is the entry-level classification in the Supervisor Technology Support Series. The classification of Supervisor II is distinguished from the lower classification primarily by the higher degree of leadership, conflict resolution, technological problem solving, and project management abilities expected of the position. The Supervisor II has overall responsibility for the technology support program and exercises a high-degree of independence in carrying out his/her assigned duties.

ESSENTIAL DUTIES AND RESPONSIBILITIES include the following. Other duties may be assigned.

- Plans, organizes and supervises the technical support program; oversees daily support needs of the District.
- Supervises, provides training and work direction to and evaluates assigned technical support team personnel.
- Schedules staff to meet technology needs, priorities and timelines.
- Evaluates level of service and effectiveness of technical support program.
- Meets with school site administrators and technicians about specific technical support needs.
- Works with site administrators to plan for increased support needs and address support gaps.
- Assigns and manages project-based and ongoing team member support assignments to assure effectiveness and balance workload.
- Manages complex technical projects including requirements definition, budget development, stakeholder engagement, technical design, implementation, staff training and communications.
- Reviews, analyzes and improves technical support and customer service procedures and related systems.
- Plans, develops, coordinates and provides staff training to update and improve technical support team knowledge and skills.
- Investigates, diagnoses and resolves complex technical issues.
- Facilitates effective communication and collaboration within support team, between technicians and other IT divisions, and with consultants and vendors.
- Identifies, evaluates, implements and communicates technology hardware and software standards.
- Determines vendors and negotiates pricing for equipment standards and special projects.
- Coordinates bids and contracts necessary for replacing, maintaining, upgrading and augmenting technology.
- Oversees technology purchasing and device repair and replacement programs. Analyzes and maintains the associated program budget.
- Reviews technology purchases to assure established standards are met.
- Coordinates technical support for District initiatives and events, including new curriculum and standards implementations, professional learning dates and State testing. Serves as a technical liaison for technology issues presented by site and District leadership.
- Researches and applies best practices related to enterprise technology management and service delivery.

- Collaborates with educational agencies, private corporations and other technical resources to continuously assess and improve IUSD technical support.
- Maintains current specialized and advanced knowledge of technology support principles and techniques; maintains appropriate technology certifications or demonstrates equivalent knowledge.
- Prepares, maintains and delivers reports and presentations related to assigned activities including IT projects, service outages and technical support program effectiveness.
- Leads and participates in staff meetings to communicate objectives, share updates, collaborate and gather feedback from personnel.
- Assists in District-wide technology planning, resource prioritization and communications as an active participant of the IT management team.
- Plans for project staffing, equipment and systems needs in anticipation of enrollment and technology program growth.
- Coordinates with facilities and maintenance staff to successfully incorporate technology standards into new construction and renovation projects.
- Communicates with personnel, departments, administrators and outside agencies to exchange information, coordinate activities and resolve issues or concerns.
- Administers device management and help desk solutions.
- Performs other related duties as required.
