

## MAINTENANCE TECHNICIAN VI-PLUMBER

### DEFINITION:

Under the supervision of the assigned supervisor, leads and performs journey level plumbing in connection with the maintenance, repair, and installation of plumbing equipment and related systems; trains and provides work direction and guidance to assigned personnel; maintains plumbing lines in safe and sanitary working condition.

### DISTINGUISHING CHARACTERISTICS:

The Maintenance Technician VI classification serves as the senior technician who can oversee special projects. Incumbents may serve as the backup Foreman and typically have six years of journey-level experience in a specific trade and/or have completed an approved apprenticeship program in a specific trade. The Maintenance Technician III- classification is an entry-level position in the Maintenance Technician series. Incumbents work independently and perform a variety of duties. Incumbents have at least two years general maintenance experience. The Maintenance Technician IV is an intermediate journey-level classification in the Maintenance Technician series. Incumbents have completed an approved apprenticeship program in a specific trade. Incumbents are expected to have four years of journey-level experience. The Maintenance Technician V has a higher degree of journey level skills than entry level positions in the series and incumbents have five years of journey-level experience.
