

Provider Questions No. IV
Digital Copiers RFI
December 14, 2022

Response to Proposers' Questions

4.1 **Question:** Are bidders to return the entire RFI document with our answers in the appropriate boxes? If so, can the District provide a workable file for this purpose?

Answer: Providers should respond using the Response Template provided at <https://iusd.org/digital-copiers-rfi>.

4.2 **Question:** Can Toshiba Business Solutions use IUSD as a reference?

Answer: Yes.

4.3 **Question:** Would IUSD allow for an exception for a vendor to partner with a major leasing company? We could then utilize two contracts, a Municipal Lease Agreement and a Maintenance and Supply Agreement both to be managed by the vendor.

Answer: Yes, IUSD would consider a vendor/lease provider partnership. However, to be considered the vendor must address the following in their request for an exception:

- **Bill Payment:** Confirm who (vendor/lessor) IUSD will be invoiced from and submit payment to for the equipment lease and any ongoing maintenance/usage/consumable/software licensing charges.
- **Bill Structure:** Confirm that the invoicing format can provide breakdowns of charges by equipment and site/location as specified in the RFI.
- **Disputes:** Provide a clear description of the process for resolving disputed charges. For example, if a copier is not performing/has not been in working order, who will suspend and/or refund charges to the District. The District does not desire to pay lessor disputed charges.
- **Warranties>Returns:** Describe the process for addressing warranty claims and requests for replacement equipment.
- **Additional Equipment:** Describe the process for adding on equipment to the original lease with a coterminous end date for the newly added equipment.
- **Agreement:** The lessor relationship (if payment is being directed to them) must be explicitly allowed under the proposed piggyback agreement (CMAS, NASPO). Vendor must provide the specific section of the agreement that allows for the partnership.

An addendum to the RFI has been issued and an additional response template has been provided for Providers to complete with their responses.

4.4 **Question:** Would IUSD allow a vendor to fill band 1 and band 2 with a black & white/ color unit that would meet or exceed the band requirements?

Answer: Bands have been provided with minimum specifications. If a Vendor desires to propose equipment that exceeds the minimum specifications Irvine USD will accept those as meeting requirements. The District understands that not all equipment meets the exact listed specifications.

4.5 **Question:** Would IUSD allow for a proposal of a 100 print per minute unit with immediate first copy speed in place of the 105 print per minute unit requested in 2.11 of RFI?

Answer: IUSD will allow for proposals with lower print per minute speeds, however Vendor scores may be adversely affected.

4.6 **Question:** The RFI states the current leases will terminate October 14, 2023. The RFI additionally states that the district would like the equipment refreshed during the summer months to minimize disruption to sites. It could be assumed that there would be a financial obligation needing to be satisfied for this exercise to be completed. Could the district provide an estimate of the potential costs associated with early termination?

Answer: The lease agreement between Irvine USD and Toshiba has previously expired and the current copiers are owned by Irvine USD. The maintenance agreement between Irvine USD and Toshiba is valid through October 14, 2023 and is based on the number of copiers serviced with no early termination fee.

4.7 **Question:** Please clarify if the Primary Contact the contact for the RFI submission (e.g. contracts specialist) or for the life of the awarded contract (e.g. sales manager).

Answer: For the purpose of this Request for Information the primary Provider contact should be the contact for the RFI, thus allowing Irvine USD to contact them with questions about the Response. It may also be helpful to include the sales manager as well, if desired.

4.8 **Question:** Can IUSD please provide a print volume report showing the last 4 years showing the total of black pages vs. color pages? If possible, can the report also show the pages by month by serial number? If this is not possible, then by model by year?

Answer: Attached is a recent report run by Papercut. This number is approximate based on readily available data. Please note, print volume has been affected by changing instructional models and operational requirements during the pandemic. Actual print volume may vary substantially from past use.

Printer usage - summary
