

**Provider Questions No. VI**  
**Digital Copiers RFI**  
*January 13, 2023*

**Response to Proposers' Questions**

6.1           **Question:** Thank you for answering our earlier questions. Additionally, can you please provide print usage data just for the last 12 months in Excel spreadsheet format?

**Answer:** Please view the file entitled "IUSD Toshiba Copier Usage from 12-20-21 to 12-20-22" at <https://drive.google.com/drive/folders/1bXMJ4VilzsUERbuSHuud0ulY7kE3SOTL?usp=sharing> for the requested information. Copiers are sorted by "Printer Name". Please note that a majority of Copiers are listed twice. Copiers that are listed with a "Print Server" name ending with "-fp" include printing use for that Copier. Copiers with a "Printer Server" name "device" include copy use for that Copier. Total use includes the copy and printing use combined. This number is approximate based on readily available data. Please note, print volume has been affected by changing instructional models and operational requirements during the pandemic. Actual print volume may vary substantially from past use.

6.2           **Question:** Can IUSD please provide BW color volume by year from 2018 to 2022?

**Answer:** IUSD does not have this information readily available. Copier use was not typical during 2020-2021 due to the shift to distance and hybrid learning. Please see volume information provided in response to question 6.1 above for usage information.

6.3           **Question:** RFP shows 196 unit being replaced, however, the printer usage data shows over 360 units currently installed.

**Answer:** Thank you for requesting clarity regarding this. Please note that a majority of Copiers are listed twice (once with a "Print Server" name ending with "-fp" and again with a "Printer Server" name of "device". The provided reports include only Copiers with Papercut installed and may include non-Toshiba devices with Papercut installed as well. The District has 204 physical Copiers. The printer usage data included with Questions No. 4 has been included in an editable version named "copiers 2018-2022" at <https://drive.google.com/drive/folders/1bXMJ4VilzsUERbuSHuud0ulY7kE3SOTL?usp=sharing> for ease of sorting.

6.4           **Question:** Can IUSD provide which units are being replaced?

**Answer:** IUSD currently plans to replace approximately 139 Copiers in early-mid August 2023, and approximately 65 additional copiers over the life of the Agreement. IUSD plans to replace Copiers that are 5 or more years old in early-mid August 2023. Copiers replaced after August 2023 are

anticipated to be replaced when they reach five years of age. Please see the RFI for additional information. Specific Copiers planned for replacement will be outlined with the selected Provider.

6.5 **Question:** As for the units not being replaced, is IUSD's intent to keep those units or will they be removed and consolidated with the replacement units?

**Answer:** Copiers that are not replaced in early-mid August 2023 will be kept until they reach end-of-life (5 years old). Providers should clarify if they are able to provide Maintenance Services including consumable supplies (excluding paper) for Toshiba Copiers, and provide pricing on the Pricing Forms. Please see the RFI for additional information.

6.6 **Question:** Can IUSD please provide the install date of the printers?

**Answer:** The majority of IUSD's Toshiba Copiers were installed in August and September 2018. Additional Copiers have been added as needed throughout IUSD's agreement with Toshiba.

6.7 **Question:** Regarding Section 1.2.18, is the question asking whether the Provider will stop supporting the school district after the Agreement ends? Before the Agreement ends? We assume we would provide service throughout the entire term of the Agreement. Please clarify this question.

**Answer:** Criteria No. 1.2.18 *"Describe when in the Agreement new leases (coterminous with the original leased equipment) will no longer be supported (ex: 6 months prior to the end of the Agreement new leases are unavailable)"* references limitations the Provider may wish to impose on requests for new leases as the end of the Agreement approaches.

IUSD expects that lease term end dates for additional Copiers will be coterminous with originally leased Copiers. For example, IUSD may request additional copiers be added to the lease in year 3 of the Agreement due to the addition of several classrooms at a High School site. Some Providers may not want to add new equipment to the lease or allow coterminous lease end dates close to the expiration of the original Agreement (ex: a 6 month or shorter lease term). While the Pricing Form allows Providers to set different pricing bands for Copiers added at later dates, IUSD is also sensitive that Providers may not want to enter into extremely short lease terms. Please enter the time frame wherein new leases may not be entered into. If new leases are supported until the last day of the Agreement, please specify any additional requirements.

6.8 **Question:** Would the district be open to utilizing an HP owned contract to fully support all vendors versus leveraging NASPO, CMAS etc?

**Answer:** Unfortunately at this time IUSD is soliciting only existing purchasing vehicles. If HP has an existing agreement through NASPO, CMAS, or a piggybackable agreement please provide the requested information in the RFI.

6.9 **Question:** Where are the 3, band 90 pmm devices located? Are they together a print shop or at different schools?

**Answer:** The anticipated locations for Band 3 Copiers with 90 ppm would be at Jeffrey Trail and University High School. Please keep in mind that provided information are estimations based on current use and are subject to change. A list of current copiers is provided at <https://drive.google.com/drive/folders/1bXMJ4VilzsUERbuSHuud0ulY7kE3SOTL?usp=sharing> for reference. Please keep in mind that these are current copiers and many have been installed after the initial 2018 installation date.

6.10 **Question:** Would the district accepted a slower speed on a 90 pmm band devices?

**Answer:** IUSD will allow for proposals with lower print per minute speeds, however Provider scores may be adversely affected.

6.11 **Question:** Does IUSD currently own it's papercut licensing?

**Answer:** Yes, we purchased our PaperCut licenses through our current provider.

6.12 **Question:** Who need access to cloud services?

**Answer:** all IUSD staff will need access to Google Drive and OneDrive from the copiers.

6.13 **Question:** Is the SD Card as a scan functionality required?

**Answer:** No, SD Card as a scan functionality is not required.

6.14 **Question:** 1.31. - what level do you need the on-site technician? Do they need to always be on-site? And what level of technical ability is the district looking for if an always on-site technician is required?

**Answer:** 1.3.1 asks "Confirm that, if selected, Provider will provide full-time, company-employed customer service professionals who are trained specifically to support the Copiers and peripherals and the configuration recommended for IUSD.". 1.3.2 asks "Confirm that Provider will appoint a single point-of-contact for IUSD for account management and escalation of issues.". 1.3.11 asks "Describe how incoming service requests are classified and prioritized. For each classification of requests, provide guaranteed response times, including initial response/acknowledgement of the request, assignment to a team/technician, on-site response time where needed, and other support milestones. Describe the process for accessing support for high-priority requests after hours. If any additional costs apply for after-hours support list them here and in the Pricing Forms." and 1.3.12 asks "Provide details related to the number of Provider's qualified technicians that are manufacturer certified.".

IUSD prefers that the selected Provider will assign one contact for account management and escalation of issues. If one account technician can be assigned to the District Providers should include

that information in their responses. It is not IUSD's intention for Providers to provide a full-time on-site technician at a District location.

6.15 **Question:** When were the district's Toshiba products installed?

**Answer:** The majority of IUSD's Toshiba Copiers were installed in August and September 2018. Additional Copiers have been added as needed throughout IUSD's agreement with Toshiba.

6.16 **Question:** Regarding 1.3.28 - What has been IUSD's experience (frequency) in needing to change copier bands in the past?

**Answer:** The District has only received a handful of requests for upgrade/downgrade Copiers to a different performance band in response to changes to site/program needs in its Agreement with Toshiba. The majority of these requests have been satisfied by switching Copiers that were already in the District's lease (ie: Site A exchanged a Band 1 with Site B for a Band 4). While the District prefers this type of flexibility, it does not anticipate a high level of this type of request.

6.17 **Question:** Regarding 2.8 – Can you confirm that the web-based printing for Chromebooks and iPads is going through PaperCut?

**Answer:** IUSD is using PaperCut Print Deploy to allow printing from Chromebooks and iPads.

6.18 **Question:** Are you currently utilizing HID card readers at the MFP in conjunction with your Papercut solution for Secure Print?

**Answer:** Yes, IUSD is currently utilizing HID card readers at the MFP in conjunction with the Papercut solution for Secure Print.

6.19 **Question:** If you are not currently utilizing HID card readers, would you like to consider them on your new MFP fleet?

**Answer:** The District is currently utilizing HID card readers.

6.20 **Question:** Would you allow for a 5 ppm machine speed variance from vendors? Example- a 55 ppm machine in a 60 ppm category.

**Answer:** IUSD will allow for proposals with lower print per minute speeds, however Provider scores may be adversely affected.

If a Provider desires to propose equipment that exceeds the minimum specifications Irvine USD will accept those as meeting requirements. The District understands that not all equipment meets the exact listed specifications.

6.21 **Question:** Can you tell us who holds the current equipment lease?

**Answer:** Toshiba America Business Solutions, Inc. dba Toshiba Business Solutions provides the current lease equipment and maintenance services.

6.22 **Question:** Do you, or will you, have return instructions for the existing machines if the incoming vendor is going to be asked to return them to the lease company?

**Answer:** Yes. Detailed information will be provided upon the selection of the new Provider. Additionally, Toshiba may remove existing Toshiba Copiers at the time they are replaced.

6.23 **Question:** Co-term question, page 21, section 1.2.7. Are you looking to add machines later on during the contract with a co-term end date and still receive the originally quoted monthly payment for a 60-month lease? Are you willing to accept a higher monthly payment for later term adds?

**Answer:** The District does anticipate replacing existing Copiers as well as site/department needs that arise during the term of the new Agreement with the selected Provider. These additional Copiers are expected to have a coterminous end date as originally leased Copiers. IUSD understands that the lease prices for equipment leased at later dates in the Agreement may not have the same price as originally leased equipment. Pricing Form 2. Lease Adjustments has been provided in anticipation of differing costs for Copiers added after the initial start of the Agreement. The Lease Adjustments form has been broken down by 12 month sections, but Providers may adjust the fields if they would prefer to break it down by different sections (ex: different lease prices every 6 months).

6.24 **Question:** Can you please provide a report that shows print volume history for the entire fleet for just the 2022 calendar year? You provided a great report with print volume history for the life of the contract, but not all devices were in place for the entire contract. That also includes COVID print volume. We are trying to determine the average monthly print volume for the entire fleet, post COVID.

**Answer:** Please view the file entitled "IUSD Toshiba Copier Usage from 12-20-21 to 12-20-22" at <https://drive.google.com/drive/folders/1bXMJ4VilzsUERbuSHuudOulY7kE3SOTL?usp=sharing> for the requested information. Copiers are sorted by "Printer Name". Please note that a majority of Copiers are listed twice. Copiers that are listed with a "Print Server" name ending with "-fp" include printing use for that Copier. Copiers with a "Printer Server" name "device" include copy use for that Copier. Total use includes the copy and printing use combined. This number is approximate based on readily available data. Please note, print volume has been affected by changing instructional models and operational requirements during the pandemic. Actual print volume may vary substantially from past use.

6.25 **Question:** Page 36, sections 3.6 & 3.8. Would you be leasing or purchasing the equipment mentioned in these two sections?

**Answer:** 3.6 asks "Confirm that proposed pricing (purchase, lease, add-ons and cost per copy) will apply to Copiers added at later dates during the term of the Agreement.". 3.8 asks "Describe how

adding additional Copiers and add-ons will impact the price. Be specific about components, costs, and timelines.”

Copiers may be leased or purchased, depending on site and department needs. The District currently has a combination of leased and purchased Copiers and anticipated replacing all Copiers at their end-of-life (5 years old). Please answer questions 3.6 and 3.8 as they apply to both leased and purchased Copiers.

6.26 **Question:** Do the schools and other sites have redundant or site servers setup currently? If yes, how many?

**Answer:** yes, all 46 schools/sites are set up with local site servers.

6.27 **Question:** section 2.20 indicates that the district desires to use existing employee ID badges as the identification cards for all staff. Could you please provide the specifications of the exact type of card currently in use?

**Answer:** ISOProx II:

Dimensions: 3.375" × 2.125" × 0.031"

Operating Temp: -50°F to 160°F

Weight: 0.24oz

Transmit Freq: 125 kHz

6.28 **Question:** Page 23, Section 1.2.17.2. Can you tell us if the copiers you are referring to here would be owned by the district or leased?

**Answer:** 1.2.17.2 asks “Describe to what extent Provider is willing to remove and dispose of Toshiba Copiers when installing Provider’s Copiers added after the initial implementation of the Copiers from this RFI to ensure limited downtime for staff. Please specify estimated time any site would be without a Copier during the transition. Be sure to include all costs associated with removing Previous Copiers and Toshiba Copiers here and in the Pricing Forms.”

Toshiba Copiers will be owned at the time of removal. The majority of leased Toshiba Copiers included a buy-out option that has been exercised. Detailed information will be provided upon the selection of the new Provider. Toshiba may remove existing Toshiba Copiers at the time they are replaced, however the District would like to obtain information from potential Providers for removal as well, to determine the best course of action.
